

This workshop, open to all, will focus on starting your family genealogy. It is not necessary that you or your family are from this county. We will discuss gathering information on the first three generations (yourself, your parents, and your grandparents). The topics covered will include obtaining vital records (birth, marriage, death); organizing your research; using Family Search website as a beginner; and learning what is in our Madison County Genealogical Library.

*A voluntary donation of \$5 would be appreciated.
